STAGE REQUIREMENTS:

- Please supply 3 band risers - 8ft x 8ft at 1 ft height (on locking rollers where necessary).
- Please supply clean, 13 amp, 230v backline power at ALL stage positions.

AUDIO REQUIREMENTS:

A professional level FOH system of reputable brand (L'Acoustics; D&B etc) is required, in full working order, flown where possible and arrayed to provide complete coverage for ALL audience members (including delays and in/out/lip-fills where appropriate). System must be free of any limiters and not produce any audible artefacts at programme SPL. System must be supplied with 2 competent, sober, English speaking system technicians (1 x FOH, 1x Mons).

2 x audio consoles from the following list: 1 x FOH, 1 x Monitors - no exceptions or substitutions:

A&H DLive
Yamaha CL Series
Digco SD Series

W/suitable I/O racks for our show: 48 in/16 Out

Please advise any venue/regional/national SPL limits for our show with you within two weeks of show day. Please include details of weighting; timing and position of measurement in the venue. Please also provide a working, recently calibrated class 1 measurement device with a suitable indication of db limit/weighting/time period at the FOH mix position from load-in and for the duration of the entire show.

SKIPINNISH require 9 x wireless IEM mixes and 2 x hardwire IEM. Transmitters and packs are supplied unless otherwise stated in the show advance. No less than 11 mixes onstage please. Additional sidfill mixes will be required for larger/outdoor stages. Please see attached for mix/output information. Please advise of local RF licensing requirements in your area during show advance.

See microphone/D.I requirements on the channel list. If any of this is not possible, please contact us at your earliest convenience with alternatives. Thanks for your help and we look forward to working with you.
